

About Behind the Scenes LLC

After working as a certified bookkeeper for several businesses, Jessica Reagan Salzman realized that most small businesses didn't get the much-needed attention and understanding they desired. She saw that many in her profession were more focused on the bigger clients, leaving small business owners unsure about not only their accounts, but how to leverage their bookkeeping to create more wealth and growth.

So she founded Behind the Scenes LLC in 2006 to help small businesses and entrepreneurs maximize their resources with bookkeeping tactics and accounting strategies.

Her exclusive model helps clients understand their monthly financial statements, and empowers them to make more effective and more profitable business decisions. It also provides clients with peace of mind that while they concentrate on revenue-producing goals, Behind the Scenes is taking care of the bookkeeping aspect of their business.

The company offers a customized approach to professional bookkeeping, accounting, payroll and tax-related services to small businesses and solopreneurs.

Today, Behind the Scenes LLC works with more than a hundred business owners, assisting them with the implementation of their bookkeeping system and turning problems into profits.

In addition, owner Jessica Salzman is designated a Professional Bookkeeper as a graduate of *Universal Accounting Center*, a member of the American Institute of Professional Bookkeepers (AIPB) and the National Society of Accountants (NSA), and she is a Certified QuickBooks ProAdvisor.
